

MeetingDem UK National Conference 21 March 2017: 10:00 to 15:30 (tbc)

University of Worcester Arena Hylton Rd, Worcester WR2 5JN

The [MEETINGDEM](#) Research programme aims to implement and evaluate the Meeting Centres Support Programme (MCSP) in the UK, Italy and Poland. This community driven, locally based means of delivering effective post-diagnostic support for people living with dementia and their families has been operational in the Netherlands for many years. MEETINGDEM has taken the learning from the Dutch model and adapted it for delivery in the three new countries.

We have established two Meeting Centres in the UK, one in Worcestershire and one in Herefordshire, in partnership with the Alzheimer's Society, and are currently in the middle of the evaluation phase to assess the benefits and cost effectiveness of the intervention and are planning to hold a day conference to share the results of the evaluation.

If you are interested in attending it would be good to have an indication of this by registering at: <https://www.eventbrite.co.uk/e/meetingdem-uk-national-conference-21-march-2017-at-university-of-worcester-arena-registration-29980891654>

We will circulate a more detailed programme closer to the event. For more information please email: dementia@worc.ac.uk
